DETAILED OFFICE ACTION

Rejections Under 35 USC 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 11, 26 and 30 are rejected under 35 U.S.C. 112, paragraph 1, as failing to comply with the written description requirement. The claims contain subject matter that the specification does not describe as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, possessed the claimed invention. This is a new matter rejection. Applicants point to no support in the specification as filed for the broadened definition of "free of the β -crystal form;" the examiner finds none. The basis on which the purity is based or determined is undefined.

Claims 33-36 are rejected under 35 USC 112, first paragraph, as not enabling, because they omit matter which the specification describes as essential to the invention as disclosed. These claims depend ultimately from canceled claims and have not been further treated on their merits.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11, 26 and 30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is not understood what is intended by the phrase "free of the β -crystal form." The basis on which the purity is based is not defined. It is also not understood how the purity is to be determined. If the reaction mixture is shown to be free of the β -crystal form as determined by X-ray powder diffraction, but not as determined by IR or DSC, or some other variation of these determinations, must the other forms of determination also be carried out?

Allowed Claims

Claims 1-10, 12-25, 27-29, 31, 32, 37 and 38 are allowed. An examiner's statement of reasons for allowance can be found in the previous Office Action.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
